

Quality Alert - revised 1/3/2013

Company: KYCON, Inc.
1810 Little Orchard St.
San Jose, CA 95125
USA
408-494-0330

Kycon prides itself on our quality and we take all quality issues very seriously. There have been a few quality issues reported in which an oily type substance has appeared on some parts. Upon further investigation it has been determined that it is batch related to specific parts that were produced with Halogen Free PBT plastic. Kycon recently discovered that this plastic contained a red phosphorous flame retardant. Depending on the process, it is possible that the red phosphorus may react in such a way that it causes this oil type substance to appear over time. There is also a slight chance that this could cause conductivity issues in certain applications. (Numbers as low as 4 Mega ohms have been detected.) Please understand that not all customer products using these parts will be affected. We are merely doing our due diligence in assuring that customers are informed and can also be proactive in their own business dealings.

The suspect date codes are 1020-1126. Any parts shipped from Kycon 6/1/10-4/30/12 may contain these date codes parts. Kycon is willing to replace any parts that you have in stock that fall within these dates.

Below is a list of affected Kycon part numbers.

KCDX-3S-S	KMDGX-4S-BS	STX-3081-5N
KCDX-4S-S2	KMDGX-4S-N	STX-3100-11C
