

Kycon's innovative Snap and Lock DC Power Connector Line includes various products that utilize the unique 'snap and lock' feature that helps to prevent accidental disconnects, for added reliability. The product line includes several socket versions such as the panel-mount (KPJX-PM), right angle board mount (KPJX), and a cable-mount socket (KPJX-CM). All 3-pin or 4-pin sockets will lock with the mating cable-mount plug (KPPX).
